	Home Province	Highest	Lowest
Number of Art Performance Troupes	_____	_____	_____
Number of Art Performance Places	_____	_____	_____
Number of Spectators in Museums	_____	_____	_____

---

Next, with the data you have collected, write a 500-word (1 ½ to 2 page) report on the data you have discovered. Write about something new you discovered in the process of research on China. You should answer the following questions in your report:

- Where is population growing fastest?
- What is the most populous province in China?
- Where would one go in China to look for a job? What province would you avoid if urban employment were desired?
- What areas of China are secure in their energy reserves, and which are not?
- Where are people adding more to their savings?
- Where are the most vocational and higher learning institutions of education to be found?
- Where one might go to have the best chance of seeing a cultural event or museum?
- Do these statistics confirm your personal experience with any of these data?

If there is any other personal knowledge you wish to share about your home province in relation to the data you have discovered, please share that as well.

Thank you, Professor Reymers

**Report due in class Friday, March 3**
